High Quality Paperback

The Square Root of 4 to a Million Places

Affordable & High Quality
Paperback Book Edition

Norman L. De Forest

What follows are the first 1 million digits of the square root of 4. Actually, slightly more than 1 million digits are given here. These digits were computed by Norman De Forest using a custom utility and a command with a lot of dollar signs in the command line. They were computed during his copious spare time on a standard IBM PC over the course of about 6 minutes and 40 seconds. We do NOT guarantee the accuracy of these digits. Although these digits have been checked once we encourage others to check them as well. Please report any errors to "Norman L. De Forest" they are the square root of the square root o
